MODEL 3PL TRACTOR MOUNTED SPRAY SYSTEM

THE INTELLI-SPRAY DIFFERENCE:

- 30+ YEARS EXPERIENCE
- SAVE TIME & MONEY
- REDUCE FRUSTRATION
- IMPROVE SAFETY
- AUSTRALIAN MADE
- REMOTE TECHNOLOGY
- SUPA-SLIP HOSE
- HEAVY DUTY
- CUSTOMER CARE

PRODUCT OVERVIEW

The 3PL model is a tractor mounted Intelli-Spray system,that utilises a 3-point linkage frame to connect to the tractor, without using the PTO shaft to power it.
With the added strength of the tractor, you can carry tank sizes up to 1000 litres.

Available as a single or twin reel system, the 3PL unit is independently powered by the Honda motor, rather then utilising the PTO shaft, reducing 'wear and tear' on your tractor.

Ideal for agricultural spot spraying, the 3PL is also ideal for mounting booms to cover large areas. The heavy duty Intelli-Spray system is designed and built for heavy duty spraying tasks, that not only eliminate weeds, but helps you work faster and more efficiently.

FEATURES

DURABLE CONSTRUCTION

The tough galvanised framework is chemical and rust resistant, avoiding rust for years to come.

3 POINT LINKAGE

The 3-point-linkage framework attaches easily to your tractor, with a robust baseplate that stabilises the unit when lowered to the ground.

ERADICATE WEEDS, FAST

Available in single or twin reel configurations, each robust reel can accommodate up to 200m of Supa-Slip® hose and is easily retracted at the push of a button. Suitable for spot-spraying tasks or can be customised to suit boom sprayers.

UV-STABILISED TANK

The UV resistant tank is moulded for maximum heat protection and comes in 500L, 700L and 1000L size options. For fast filling options, you can have a Venturi Fast Filler fitted which will fill your tank at 3 times the rate of the pump.

TWIN REEL
GALVANISED

POWERED BY HONDA

Powered by a reliable Honda motor, you have the option of selecting a 5HP or a 9HP engine for your spraying needs. The motor runs independently of the tractor, so you don't need to utilise the PTO shaft.
