GPI-160 / GPI-200 DAM PUMP

PRODUCT OVERVIEW

The Dam Pump Trailer – a practical solution for small farm owners who often face limited access to water and power when it comes to irrigation. We understand the importance of having access to water for your property, especially when reticulated bore water may not be available. That's why we took it upon ourselves to design the Dam Pump Trailer.

The Dam Pump Trailer comes in two versions. The GP-160 is powered by a Honda GX160 petrol engine and Davey single stage firefighter. The GP-200 comes with a more powerful GX200 and Davey twin stage firefighter. Both trailers have a 23L fuel tank capacity, which can operate continuously for up to 20 hours.

This solution enables small farm owners to pump water from a Dam easily and efficiently, allowing for adequate irrigation without the need for reticulated bore water.
