GPI-100 / GPI-150 SOLAR POWERED TRAVELLING IRRIGATOR

PRODUCT OVERVIEW

The Intelli-Spray Solar-Powered Travelling Irrigator features smart technology that lets you set and forget a timer. This means you can irrigate without needing constant supervision, freeing up time for other tasks.

The irrigator is equipped with a 25AH AGM solar-charged battery that powers the motor, which then retracts the hose, helping to minimise water and pressure loss. It provides a full 8 hours of retraction without needing to be recharged, making it ideal for use during the day or night.

FEATURES

ATV TOWABLE & EASY TO TRANSPORT

Versatile and agile to move around any farm or paddock.

SOLAR-POWERED

Powered by the sun, the sprinkler is retracted by a 12V or 24V motor not by flow or pressure

PERFECT FOR A RANGE OF AREAS

Ideal for paddocks, equestrian arenas, parks, schools and sports ovals

EFFICIENT IRRIGATION WITH LOW PRESSURE AND FLOW RATE

Designed to operate at a pressure as low as 20 psi, making it 100% water-efficient.
