GP1200

6-IN-1 SEEDER

PRODUCT OVERVIEW

The Intelli-spray GP1200 6-IN-1 Seeder exemplifies how we can add value to our customers by helping them reduce maintenance costs and improve efficiency in their farming operations.

Creating and improving pastures can be a challenging and time-consuming task for landowners. Traditionally, seeding required a tractor and up to six different implements to disc, plough, fertilise, seed, cover, and roll. With the 6-IN-1 Seeder, you can complete all six functions in a single pass without needing a tractor; an ATV or UTV is all you require! Using an ATV or UTV reduces soil compaction because it exerts less weight on your pasture during operation.

Don't need to perform all six functions? Not an issue.
The Seeder can employ the discs, fertilizer boxes, drag, or roller separately or in any combination.
